- .08 life skills (Shops and Home Economics at Warren Collegiate): Mr. Mark Hnatuk and Ms. Christie Crow
- .10 Guidance counsellor: Mrs. Monica Baldwin
- .10 Resource: Mrs. Andrea Schutz
- .50 Administrator: Mr. Tyler Oliver

### **School Priorities 2014-2015**

1. Literacy
2. Numeracy
3. Intellectual Engagement
4. Positive Respectful Learning Environment

## 1. Literacy

Vision: Grosse Isle School will achieve excellence in literacy through effective planning and instructional practices.

- Our school developed a *balanced literacy approach* that teaches and supports comprehension and critical thinking strategies in reading and writing in all curricular areas. To accomplish this we used the support of our Division's Literacy Lead Teacher.
- Our teachers attended valuable and practical professional development by Faye Brownlee (Systems Look at Reading Growth and Implementing Class Reviews) and Penny Kittle (Engaging Adolescents in Authentic Reading and Writing), both renown experts in the field of balanced literacy.
- We expanded both our classroom and school libraries with books that appealed to all readers and reading levels. We used part of our school library budget and took our students to Chapters where they had an opportunity to choose books that appealed to them. By doing this we expanded the range and choices of texts that students had to read and write with.
- Through support from our Literacy Lead Teacher we were able to develop productive instructional strategies, such as inquiry, problem-solving, and decision-making.

## 2. Numeracy

Vision: Grosse Isle School will achieve excellence in numeracy through effective planning, instruction, and assessment practice.

- We integrated technology to differentiate math instruction for both enrichment and to reach our students who struggle with concepts. We used the support of our lead teacher in the area of Technology for Inclusion to download appropriate apps that engage kids in their mathematical experiences.
- We have purchased more iPads to further enhance and foster numeracy gains.
- Mental math instructional practices were developed which resulted in greater success in both fluency and accuracy with facts. Our Numeracy lead teacher modelled and guided our teachers through this process.
- Numeracy lead teacher taught teachers and staff how to effectively use a mathematical text such as text books and printables. Students learned to decipher the language of math on a higher level than before.

## 3. Intellectual Engagement

- Our school developed and refined initial assessment and classroom profile processes for literacy (RAD) and Numeracy. This enabled us to plan appropriately for the students in our classroom. We identified learning gaps and planned ahead using the backwards model and differentiated instruction.
- In addition we collected data on student success and struggles. We had a second round of classroom profile meetings to identify steps needed to address challenges discovered.

#### 4. Positive Respectful Learning environment

- We collected our data from our fall Tell them From Me survey to examine how our students felt about their learning environment. We used these results to direct our school initiatives around extra-curricular and classroom management strategies. This data led us in the direction and focus of several of our PLC meetings as well as some of our student voice initiatives.

#### Some 2014-2015 Year Highlights

- September 5- Pancake breakfast
- September 11- Grosse Isle School open house
- September 24- Terry Fox Run raised \$103.10 for the Terry Fox Foundation
